

## Soft Form® Hernia Brief

Hernia support built into a brief....  
a truss and undergarment in one!

The Soft Form® Hernia Brief offers gentle relief from reducible inguinal hernias by providing adjustable and comfortable compression. May be worn in lieu of a regular undergarment and, with hernia support built into the brief, eliminates the need to wear both a regular undergarment and a bulky truss. The Hernia Brief is made of soft, lightweight materials and features hook and loop adjustable compression straps for ultimate comfort. A plush waistband allows for comfortable and extended wear. The removable foam cushions are designed to provide gradual compression around the affected area with focused compression on the hernia, reducing and/or pushing the inguinal hernia back. Compression straps are easily adjusted. Either pad can be removed to treat a single hernia. The Soft Form® Hernia Brief comes in a white color and low-profile design which can be worn inconspicuously under most clothing.

## What are the symptoms of a hernia?

- Symptoms of a hernia include pain or discomfort and a localized swelling somewhere on the surface of the abdomen or in the groin area. Other symptoms include:
- Pain or discomfort in your groin, especially when bending over, coughing or lifting.
- A heavy or dragging sensation in your groin.
- Occasionally, in men, pain and swelling in the scrotum around the testicles when the protruding intestine descends into the scrotum.

## Supporto Truss

Athletic-type abdominal brief is designed to provide rupture relief with the added comfort of spandex, with two foam pads. Fits right, left or double hernia. Lightweight, cool and washable. Easy to put on and wear. Exclusively-designed 3" elastic band stretches over the pads for extra compression.
